

Petenwell And Castle Rock Stewards

PO Box 164 Nekoosa WI 54457 PACRS.org

Dear PACRS members and non-members,

Thank you to those who have supported PACRS with your membership!

PACRS has been working on improving water quality and recreation on Petenwell and Castle Rock lakes since 2007. Developing partnerships with County Conservation departments, WI DNR, conservation professionals and producer led groups in the Wisconsin River Basin has been the foundation of our citizens group.

We are very excited about recently becoming the fiscal agent for a producer led group Farmers of the Roche-A-Cri. This position for PACRS is the first in the state where a citizen group is the fiscal agent. Being fiscal agent does not have a direct increase on PACRS expenses. We firmly believe that supporting producer led groups has a direct impact on water quality. Attending a seminar a farmer put it this way, "We are the solution".

PACRS (non-profit 501c3) is trying to increase our membership base and are asking for you to consider an individual membership or donation to support our efforts. We are providing a direct link to our "get involved" page and a QR code for easy access. You may also mail a check to our address listed above.

<https://pacrs.org/get-involved>

Thank you for your consideration and feel free to contact us with any questions or if you wish to have us visit your group. pacrs.info@gmail.com

Sincerely,

Scott Bordeau
